

AMENDMENT TO THE SPECIFICATION

Please amend the following paragraph.

Fig. 1A shows a first extruded length of clamp section. Lines 1 in the figure indicate that, for example, a multiplicity of clamps may be cut from the extrusion in the width prescribed by the distance between the lines or broken off at marked predetermined breaking points (also shown in Fig. 1D as solid lines and indicated as "S") with it being possible, however, that the clamp has the entire width shown. For such an eventuality hole 2 is provided, by means of which the clamp may be hung on a hook.
